

dV-TRAINER™

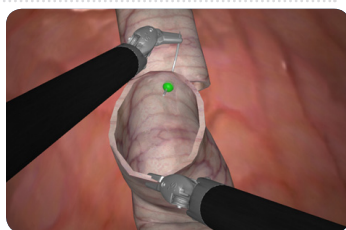

by mimic

Comprehensive & Realistic Training

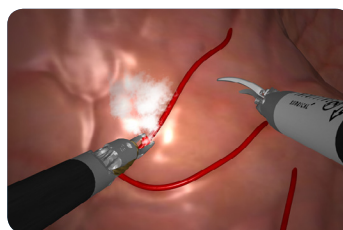

- ▶ Relevant to all surgical specialties
- ▶ Developed with leading educators
- ▶ 40 plus exercises of various skill levels
- ▶ Dry lab and organic environments
- ▶ Cognitive learning with multimedia material

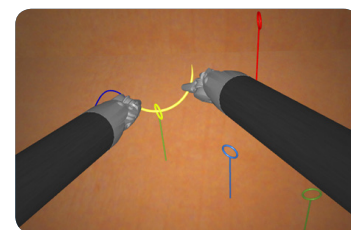

- ▶ **Camera & Clutching**
Improve camera control and learn to use the clutch effectively. Train while using different motion scaling settings.

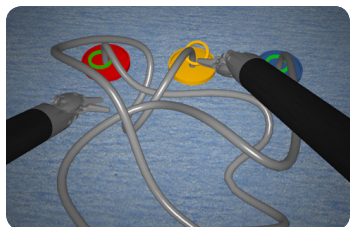

- ▶ **Needle Driving**
Improve needle driving accuracy under a variety of scenarios. Practice with a range of geometries common to surgery.

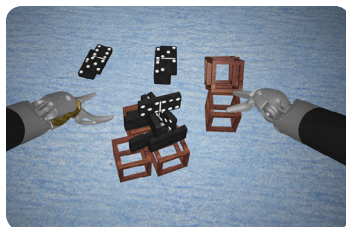

- ▶ **Energy & Dissection**
Learn to properly apply monopolar and bipolar energy. Practice dissection and manage bleeding.

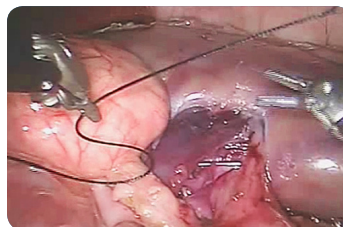

- ▶ **Needle Control**
Develop skill when manipulating needles. Learn to effectively hand-off and position needles for correct needle driving.

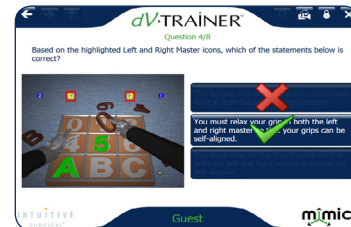

- ▶ **EndoWrist® Manipulation**
Develop *EndoWrist* dexterity when working with one, two, or three *da Vinci*® instruments.

- ▶ **Games**
Have fun competing against the clock while developing robotic surgical skills at the same time.

- ▶ **Video Content**
View instruction videos of *da Vinci* Surgical System.

- ▶ **Surgeon Console Overview**
Review basic *da Vinci* functionality. Covers basic topics such as icons, ergonomics, and *da Vinci* settings.
